## LETTER OF RECOMMENDATION

11 April 2019

### To Whom It May Concern,

I am writing to recommend Sergey Kredentser who has recently successfully completed his internship at Sensorama Lab as a junior Unity developer.

I have witnessed Mr. Kredentser executive talent and eagerness to work hard on many occasions through his studying at Sensorama Academy and further internship at our company. As a Chief Executive Officer of Sensorama Lab, I had an opportunity to observe Mr. Kredentser in a variety of educational and job settings that have made me believe he would be a good candidate for admission to your institution.

Sergey was a student at Sensorama Academy and an intern at Sensorama Lab. In the course of work he has demonstrated a strong willingness to learn new skills. Throughout his experience at our company, Sergey has managed to upgrade his knowledge working with Unity and 3ds Max from elementary to intermediate level only within a few months. Examples of Sergey's achievements include:

1. Successful completion of a virtual reality project during the Sensorama Academy course.
2. Work with 3D-models and development of in-house Chornobyl project.

Sergey recognizes the importance of a strong work ethic, persistence, and intellectual integrity. His skills and willingness to learn something new every day serve as a great example of a worker.

Throughout his experience at our company, Sergey demonstrated discipline, ingenuity and self-motivated attitude to learn new technologies. By the end of the internship, he gained experience of the workflow of the company, team cooperation and solidified his professional skills. Therefore, I genuinely recommend Sergey to any position he might apply within your institution.

Sincerely,

---

Sergey Tereshchenko  
CEO - Sensorama Lab
